October 15, 1976

Dear Harold Weisberg,

I have been interested in the John Kennedy assassination since it happened, and from time to time through the years I have been in contact with you concerning your work. The other day I was looking through Oswald in New Orleans and it occured to me to ask you if you can now enlarge on something you wrote in that book (p. 401.)

Referring to the Houma munitions burglary you write:

> The New Orleans reporters are working on another angle of this operation that involves the intelligence organization of a large European power. I preserve their confidence and will say nothing about it other than that its motivation was fascist.
>
> When the entire story is disclosed, we may find one intelligence agency burglarizing another and more than one munitions theft.

Are you now able to tell what you hinted at back then? I am still interested in these matters, especially in the Duble Chek connection, and I think Novel is an important figure.

If it isn't too inconvenient I would very much like to hear from you.

Sincerely,

Marvin Longton
